

**Provent filters:**

On the left you can see a filter that was inspected after 3000 miles it shows the level of oil that at times was accumulated inside the filter.

The filter on the right is a new filter element.

View of the Provent canister the filter "O-ring" seals on the ridge inside the canister and oil enters the filter through the opening in the center.

**Overhead view of optional Provent cover plate with optional LED light kit and lights on during day light hours**
