

# Injector Data and Flow Conversion Calculator

Major Injector manufacturers (eg. Bosch) do not rate injectors in flow/time (cc/min), they use mass/time (g/min). You can be sure that if the data for a Bosch injector is displayed in units other than g/min then the data has been converted mathematically or the information has been provided by private testing. Be wary of it's source! This converter will change injector data between units.

## General Notes:

- \* Injector data is useless without knowing the test pressure used.
- \* Test fluid must be known, particularly if converting from mass to flow, as the fluids density is vital.
- \* Most injector data is relevant for 'Q-stat' (inj turned fully on, not pulsed), two injectors types can have same Q-stat but completely different dynamic flow rates.
- \* Conversion calculations, as below, can be used as a good comparative guide but they do not allow for factors such as test fluid viscosity, only density.
- \* Injector HP sizing calculations (internet is full of them) are based on many assumptions, particularly engine efficiency. Never the less, they are a good starting point.

You will always need to test thoroughly on the engine. Remember that fuel pressure is a variable you can use that effects flow rate also!

## Fuel Injector Technical Data

For factory published specifications of common Bosch Injectors please view the "Injector Spec's" tab at the bottom of this document.

This calculator will convert your known injector flow data into other units.  
Data used: N-Heptane 0.684 g/cc, petrol 0.75 g/cc, gram is 0.0022046 pound.

	g/min N-Heptane	g/min Petrol	cc/min N-Heptane	cc/min Petrol	lbs/hr N-Heptane	lbs/hr Petrol
Enter known data in appropriate box →						
g/min N-Heptane						
g/min Petrol						
cc/min N-Heptane						
cc/min Petrol						
lbs/hr N-Heptane						
lbs/hr Petrol						

## The following calculator will reveal what effect altering pressure will have on your flow rate:

Current flow (at known pressure)	<input type="text"/>
Known test Pressure	<input type="text"/>
Desired new Pressure	<input type="text"/>
<b>Calculated Flow rate at the new pressure</b>	<input type="text"/>

# Fuel Injector Technical Data

The following data has been published previously by Bosch for use in the aftermarket.

Part Number	N-Heptane Flow Qty g/min @ 3 Bar	Coil Resistance (ohms)	Design Type	Connector	Comments
